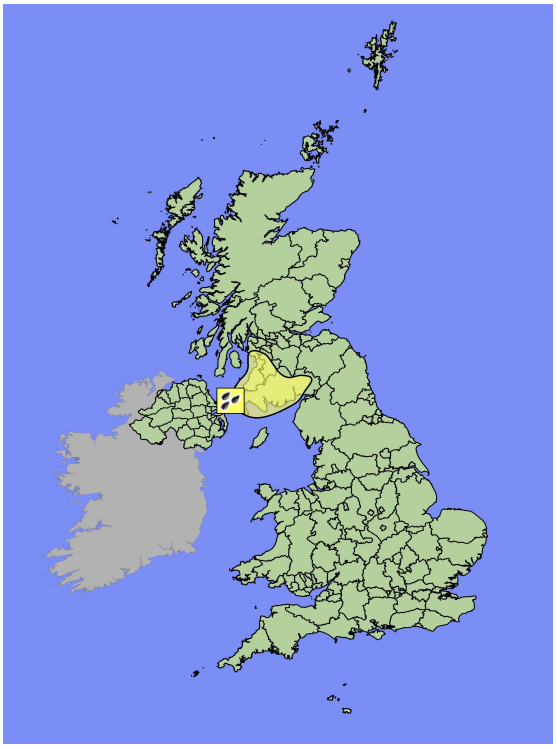
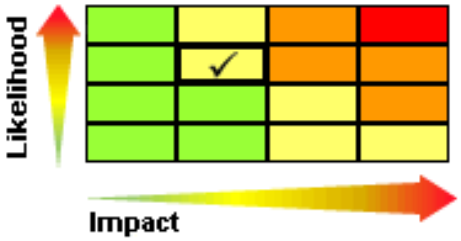
National Severe Weather Warning Service





Chief Forecasters Assessment
Rain associated with a slow-moving, waving cold front is expected to affect parts of Scotland from Monday through Wednesday. Current indications suggest southwestern Scotland as most likely to see the most persistent rain during this period. 20-30mm of rain are likely quite widely and over southwest facing slopes and peaks 50mm is possible, perhaps even locally 70mm or more.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **15:00 on Tue, 13th Nov 2012** until **12:00 on Wed, 14th Nov 2012**

Persistent heavy rain is expected to affect parts of southwestern Scotland. Starting on Monday, the heaviest rain is likely during Tuesday before rain eases on Wednesday. Falling on already saturated ground, the public should be aware that this rain could lead to some localised disruption and the possibility of flooding.
